

S S MEHTA & SONS LTD
CIVIL ENGINEERING CONTRACTORS
ESTABLISHED IN 1959

2014/2018 PROFILE

Proudly Kenyan

Executive offices at Eldama Park, Nairobi

Works in progress at the Kangema-Gacharage (C70) Road

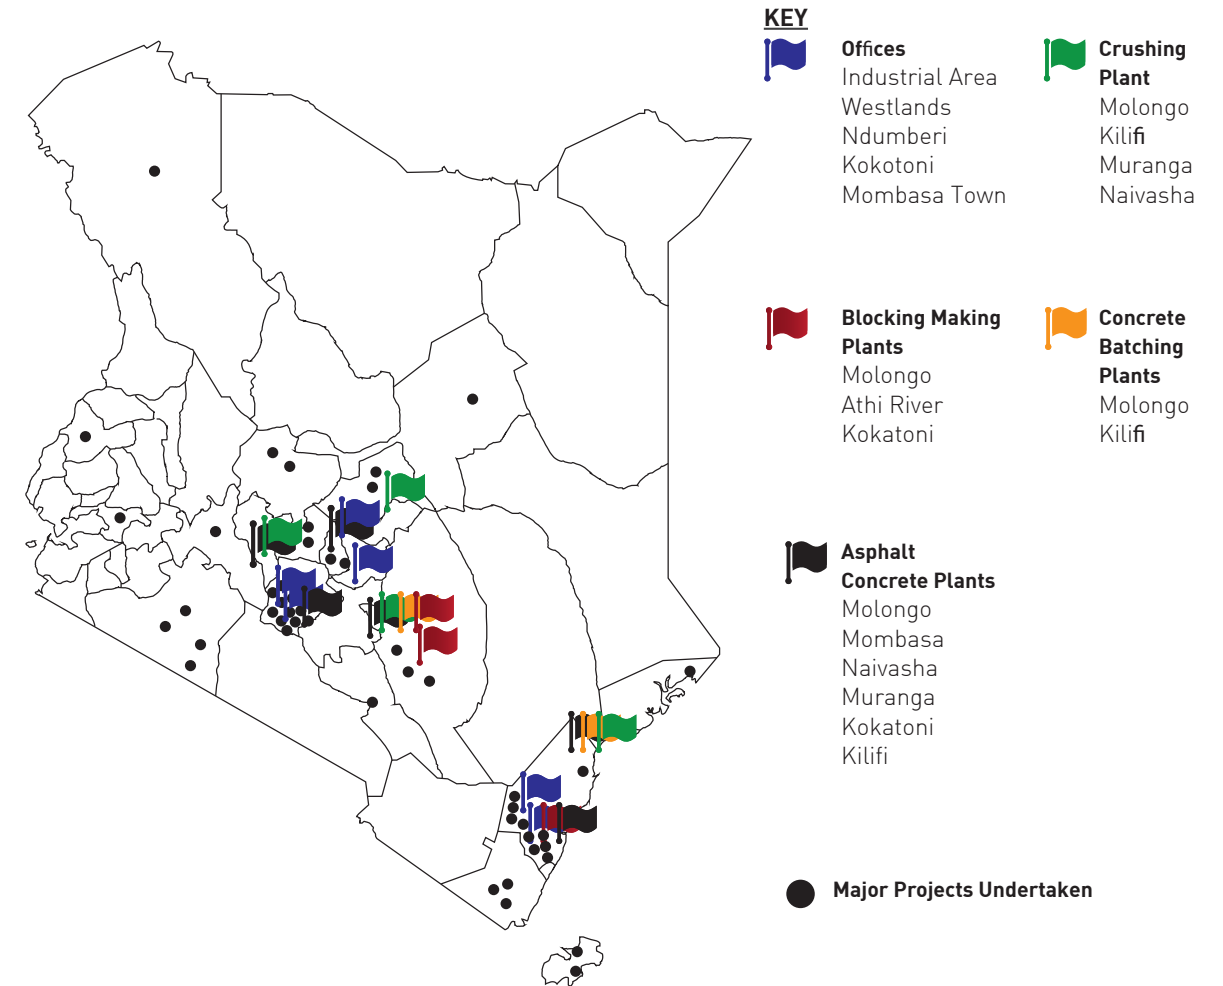

Completed section of the Ndumberi-Kiawaroga Limuru Road

ABOUT US

Established in 1959, S.S MEHTA & SONS Limited is an accomplished, experienced and highly geared Civil Engineering establishment. The company delivers a full scope of Civil Engineering works on several sites at any given time. We operate both as the principal contractor for projects both in the private and public sector with an extensive client base ranging from international donor organizations, city councils, local authorities, developers and national and international airports.

The company is able to and has undertaken projects of varying contract values that extend up to over 10 Billion Kenyan Shillings (USD 120 Million). Additionally, the company is fully facilitated to operate several projects simultaneously, even if sites are geographically located far apart from each one another.

The company is fully facilitated and geared up to operate several projects simultaneously, even if the sites are geographically located far apart from one another as illustrated below.

OUR PROFILE

Ever since the company was founded in 1959, we have independently developed the skills and capability to provide a complete range of ground works and civil engineering works. This allows our clients to make choices to access all or only part of services available.

It is important to note, that our ability to deliver all services in the field is extremely beneficial to the client, as valuable time is saved, that would otherwise be used in sourcing, selecting and administering multiple suppliers. Additionally, single project responsibility and accountability is promoted, enabling the client to monitor progress more efficiently.

Among the projects we have undertaken include;

- Rehabilitation of national highways & urban roads
- Repair and rehabilitation of international airports
- Construction of airstrips
- Major concrete works such as bridge & flyovers
- Development of industrial parks
- Development of commercial complexes and residential estates
- Milling and recycling asphalt roads
- Construction and rehabilitation of gravel roads
- Trunk sewers, oxidation ponds and treatment works
- In take works water supply distribution and associated works
- Dam construction
- Major earthworks

Ongoing earthworks on the Kangema-Gacharage (C70) Road

Base complete at a section of the Kangema-Gacharage (C70) Road

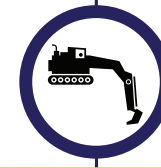

Completed section of the Ndumberi-Kiawaroga Limuru Road

Our equipment portfolio includes but is **not limited to:**

OUR STRENGTH

EARTHWORKS

- 92 Dump Trucks
- 29 Sheep Shoe & Flat Rollers
- 29 Graders

- 1 Road Ripper
- 1 Concrete Batching Plant

LOGISTICS

- 68 Pick Up/SUVs
- 31 Water Tanks
- 6 Saloon Cars
- 6 Prime Movers
- 6 Generators
- 3 Tractor Trailers
- 1 Mobile Office

- Over \$5 Million invested this year to purchase brand new equipment this year.

OUR REPUTATION

By drawing from a wealth of experience projects of varying size, budget and specification are completed efficiently through sound management and operations. Led by seasoned hands on engineers and implemented by a motivated and loyal workforce, every S.S MEHTA & SONS Limited site runs to deliver on time. We also believe in constantly making positive changes that enhance Company performance and are continually evolving to provide optimum results.

The Company adopts the following criteria to deliver quality solutions:

1. An ability to solve problems immediately should they arise. Our engineers clearly understand and thrive on technical challenges, even under inhospitable conditions in remote areas.
2. A professional, courteous and safe approach, particularly on sites where public and any public services are affected.
3. We rely on our own resources including a full fleet of small and heavy plant and equipment, that is regularly upgraded and fully maintained by our own technical and mechanical support.
4. The determination and inherent flexibility to get all works completed by following a well planned schedule of works, mobilising equipment without delays, delivering materials on time and monitoring progress closely.
